DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ruegg (U.S. patent 3,875,349).

Ruegg teaches a microphone system that comprises a microphone (12) and a switch (22, 23) as claimed (col. 3, lines 14-32). As broadly claimed, Ruegg further teaches at least one audio port (32, 35) coupled to the microphone (12) providing directional functionality in response to the switch (col. 6, lines 29-35). As shown in figures 2 and 5, the microphone, the movable switch and the audio port are formed in one unit.

Art Unit: 2615

Ruegg does not specifically teach that the microphone (12) is a MEMS microphone. However, Ruegg does estimate a microphone being small in size (col. 3, lines 42-44 and col. 5, lines 1-3) and providing a MEMS microphone in a communications device is known in the art.

Therefore, it would have been obvious to one skilled in the art to provide any type of a microphone in the Ruegg microphone assembly such as a MEMS microphone with a MEMS switch for better applying and fitting a small transducer in a communications device.

Further, since Ruegg shows the microphone, the movable switch and the audio port that are formed in one unit; it therefore would have been obvious to one skilled in the art to provide the microphone (12), the switch (22, 23) and the audio port (32, 35) of Ruegg that are integrated within a single package for an easy assembly.

Allowable Subject Matter

3. Claims 1 and 4-9 have been allowed.

Response to Arguments

4. Applicant's arguments with respect to claim 10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2615

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
